Linear print speed and character pitch are interrelated on all CIJ printers. The Videojet UHS speeds detailed in the table above are rated for 10 characters per inch. The printers maximum speed is either faster or slower based upon the chosen character pitch.

Speed is shown in (meters per minute)

*Additional font options available

Clear, consistent codes

The 1000 Line produces the sharpest codes in the industry. It precisely places every drop, so marks are always clear and easy to read. Dynamic Calibration automatically maintains consistent print quality, even if environmental conditions change.

The Videojet 1000 Line printers are all available with the option of either a 50 micron, 60 micron or 70 micron nozzle inside the printhead. The 70 micron nozzle will benefit customers who require higher contrast or bolder characters, better visible resolution and greater throw distance. The 60 micron nozzle is well-suited for applications that require stronger character definition (ie. Asian and Arabic fonts), smaller print such as that seen on pharmaceutical and cosmetic products and additional spacing between multi-line prints. The 50 micron nozzle, and its specifically paired inks, are designed for high speed applications that require more drops per second and therefore use smaller drops. This nozzle size is also used to get smaller characters and/or more characters on the same space.

Variety of ink choices to match your application

Dye based inks

Videojet offers a variety of ink colors to print on light substrates. Available in black, red, blue and green.

Dye based speciality inks

Some formulations have special characteristics like color change under retort process, optimized performance for high speeds/small nozzle size, alkali washable, food grade and visible under UV light.

Retort process

Food grade

Ultra high speed

Pigmented inks for high contrast applications

Videojet offers pigmented fluids ideal for applications requiring high contrast, bright codes on dark or difficult to mark surfaces. These inks provide easily readable codes for applications in the parts marking, extrusion, wire and cable, beverage, electronics, food and personal care markets.

These inks operate in the Videojet 1710 model and deliver high print quality, excellent adhesion and superior contrast.

Graphics and logos Create custom logos on PC and upload via USB	<p>TO OPEN CUT AT LINE</p>

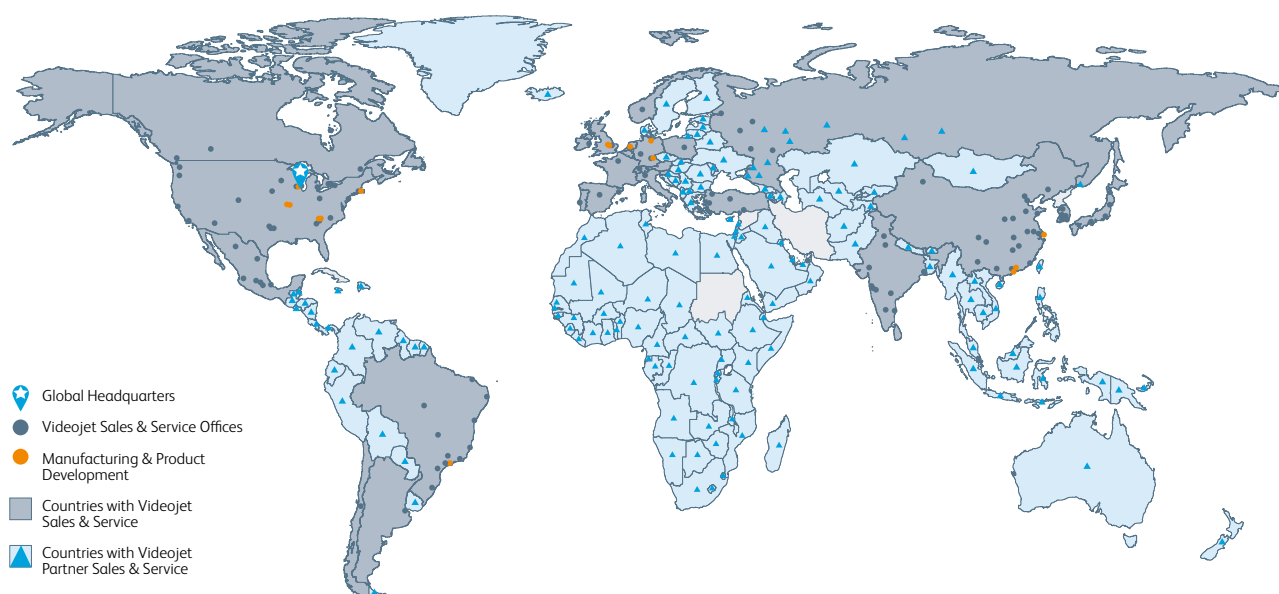

*Only available on 1520, 1620, 1620 UHS & 1720 models

Peace of mind comes as standard

Videojet Technologies is a world-leader in the product identification market, providing in-line printing, coding, and marking products, application specific fluids, and product life cycle services.

Our goal is to partner with our customers in the consumer packaged goods, pharmaceutical, and industrial goods industries to improve their productivity, to protect and grow their brands, and to stay ahead of industry trends and regulations. With our customer application experts and technology leadership in Continuous Inkjet (CIJ), Thermal Inkjet (TII), Laser Marking, Thermal Transfer Overprinting (TTO), case coding and labeling, and wide array printing, Videojet has more than 345,000 printers installed worldwide.

Our customers rely on Videojet products to print on over ten billion products daily. Customer sales, application, service and training support is provided by direct operations with over 3,000 team members in 26 countries worldwide. In addition, Videojet's distribution network includes more than 400 distributors and OEMs, serving 135 countries.
